Dear Parent / Carer,

Re: Sam Learning

Hendon School has access to a fantastic online learning package called SAM Learning. The reason the school offers this facility is because it has been proven to improve students' results. Through using SAM Learning your child will get the opportunity to customise their own private study at home. At Hendon we really believe that SAM learning can make a difference to students' futures and raise their academic potential.

From now on every student in Year Eight will be expected to complete a one hour session on SAM learning a week and this will be checked for completion using the data available. Each student has an individual login to access the site and this can be completed at home or in school. If your child does not have access to a computer then it is their responsibility to do this in school.

To support the work we are doing in school, could you please check that your child has used the programme for at least one hour each week. This could be done through having discussions about specific topics they have been working on. It would also be a great idea for your child to focus on any subject topics that they are not so confident with.

If your child does not complete their one hour weekly session, they will be expected to stay behind after school on Thursday for a one hour catch up session with myself so that I can monitor and see that the work has been done.

Should you have any questions on this matter then please feel free to contact me.

Yours faithfully,

Mr G Hall

(Head of Year 8)
