

Year 8 Enrichment Week

At Hendon, we believe enrichment activities that involve students learning outside the classroom are crucial for lifelong learning. Providing experiences to learn outside of the classroom exposes students to real-world applications of classroom concepts, making education more engaging and meaningful. Additionally, this also provides students with an opportunity to build life skills such as problem solving, communication, team work and resilience. With this in mind we ensure that every student in year 8 is provided with a full week of STEM activities designed specifically around bringing their learning to life.

Date: Monday 23rd –Friday 27th June
Theme: STEM
(Science, Technology, Engineering & Mathematics)

Activities: London Zoo, Orienteering, Adventure Island Southend, Forensic Science & Engineering
Rude Goldberg machines.

Cost: £30 for 5 days of activities

*Two payments of £15 to be made via ParentMail

** First deadline for £15 payment- Friday Feb 7th

** First deadline for £30 payment- Friday April 4th
